PATENTS OF VALUE

Many otherwise meritorious and valuable inventions are rendered worthless from the standpoint of patent protection due to lack of skillful prosecution, which is necessary in order to obtain claims of broad scope and protective value. Have had 20 years' experience in patent practice. Highest references.

When possible I always advise a personal interview, which is much more satisfactory, owing to the technical nature of patents. Full information given upon request. No charge for advice.

Having a branch office near the Patent Office at Washington, and an office where you can handily come and explain your invention, I can guarantee prompt and unexcelled service. Associate offices in all the leading countries of the world.

Nothing is asked in return except your good will, and their advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance.
